Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4 and 7-10, drawn to a thin film formation method.

Group II, claim(s) 5-6 and 11, drawn to a thin film formation apparatus.

Group III, claim(s) 13-15, drawn to a solar cell.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups are that the method, apparatus and the product comprise plural antenna elements, the first end of the first linear conductor and the first end of the second linear conductor of each said antenna elements being electrically connected to each other, a number of said antenna elements arranged in a chamber so that the said first and the second linear conductors are placed alternately in plane with equal intervals, forming one or more array antenna(s), the second ends of each of the said first linear conductors connected to a high-frequency power source, and the second ends of each of the said second linear conductors are grounded. This element cannot be a special technical feature under PCT rule 13.2 because the element is shown in the prior art. WO 01/088221 teaches the above mentioned technical features (see Claims; technical field, mode 4, example 1; Figs. 5 and 6)

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
